

1. General

NextGen Predictions is a company specializing in using cutting-edge Machine Learning and Artificial Intelligence (AI) models to automate repetitive tasks and predict trends across various business environments. Our approach focuses on deeply understanding each client's specific challenges and opportunities, enabling us to create highly customized solutions.

2. Foundation and Team

The company was founded on January 17, 2024, by four engineers educated at two of the most prestigious universities in Chile:

David Clerc, Business Engineer from the University of Chile.

Daniel Hevia, Mechanical Civil Engineer from the University of Chile.

Darwin Sanhueza, Mathematical Civil Engineer from the Pontifical Catholic University of Chile.

Sebastián Santos, Mechanical Civil Engineer from the University of Chile.

3. Mission and Vision

We are a team of experts dedicated to delivering top-tier AI solutions to elevate your business.

Our mission is to optimize business processes by implementing solutions that enhance operational efficiency, reduce costs, and save time, driving our clients' competitiveness.

Our vision is to be leaders in the integration of artificial intelligence into businesses, achieving more efficient, profitable, and future-oriented management, enabling leaders to focus their energy on innovation and strategic growth.

4. Products and services

a. AI Multifunctional Assistant for Support or Sales

In a world where speed and accuracy are key, our solution stands out by offering human-like interaction that ensures rapid and precise problem-solving, available 24/7. More than just a support channel, our system becomes a strategic tool that not only responds to queries but also captures contact details and interest levels from users interacting with it, effectively qualifying leads.

Leveraging these interactions, our system can automatically schedule calendar appointments or demos for new interested clients, ensuring timely and personalized follow-ups. Additionally, it guides prospects through the sales funnel, engaging them proactively and supporting them at every stage of their journey toward conversion.

With this comprehensive approach, we transform customer support into an opportunity to drive sales, enhance user experience, and maximize the impact of every interaction.

b. NextGen Automate: AI-Powered Automated Reports

Imagine an AI designed to revolutionize how we interpret and present data. This tool transforms complex information into clear, easy-to-understand narratives, breaking down technical barriers so any user can make informed decisions. Beyond generating reports, it provides written analyses that highlight trends, identify anomalies, and offer actionable recommendations to drive optimization and growth.

Its ability to spotlight the most relevant KPIs is complemented by personalized strategic suggestions, turning each report into a practical roadmap to success. With seamless connections to multiple data sources, it integrates all necessary information into a single cohesive document, ensuring no critical detail is missed.

Additionally, its email integration enables automatic report delivery directly to your inbox, simplifying distribution and ensuring immediate access to key insights. This AI doesn't just automate reports; it transforms them into a strategic tool that empowers confident decision-making.

5. Pricing Models

Projects are paid 50% upfront, with the remaining balance upon completion of the final stage. Both payments are made with a 30-day invoice from the date of issue.

6. Contact
